

CDX Plus Online Access Pack

Here is the new easy way to access CDX Plus Online.

Simply insert the CD-ROM into your PC and follow the quick and easy registration instructions. One full year of unlimited access to CDX Plus Online starts the moment the registration code is confirmed.

- Now all your students can register themselves in your CDX Plus Online system – which means a lot less admin work for your supervisor.
- Now you can more easily pass on the cost of providing CDX access to your students. You or your bookstore can sell the CDX Access Packs to the students, just like a textbook – which means less demand on your budget.

How does the CDX Access Pack work?

- Every CDX Access Pack has a unique Serial Number on the outside and a unique Registration Code sealed on the inside and protected with a tamper-proof seal.
- Your bookstore can manage their inventory with the barcode serial numbers and ISBN number
- CDX links all your unique Access Packs to your institution's CDX Plus Online system when they are shipped to you
- The 12 months access time starts for each student when they first register
- Students can renew their access for another 12 months simply by buying and registering another CDX Access Pack when the first one runs out
- The CD-ROM autoloads the registration/renewal process, then lets the student launch CDX Plus Online immediately.
- Students can even put in their own Student ID number and identify themselves with their own class group – which means even less admin for you to do.
